

initWeightsAndBias

```
graph LR; A[initWeightsAndBias] --> B[ReLuKernel]; B --> B;
```

The diagram consists of two rectangular boxes. The first box, on the left, is gray and contains the text 'initWeightsAndBias'. A straight blue arrow points from the right side of this box to the left side of a second box. The second box, on the right, is white with a black border and contains the text 'ReLuKernel'. A curved blue arrow originates from the top of the 'ReLuKernel' box and points back to the top of the same box, forming a self-loop.

ReLuKernel
